Writing...  
and something  
more

 **Goldring®**

PEN OUTSIDE. SURPRISE INSIDE.

A woman in a white lab coat is looking at a patient's chart. The chart has a smiley face stamp and the name 'CHRIS' with the number '072471'. The image is framed by a large orange circle and a purple background with orange triangles.

**TW**

Twin.  
The pen that  
converts into a  
stamp with a flick of  
the wrist. Turn pen  
180°, press the clip  
and the surprise is  
revealed.

# Surprise

Create a surprise, draw attention to yourself - the Twin meets the needs of the youth target group perfectly. With an innovative function and a trendy look, the Twin is starting to become the cult pen of the young generation from 12 and 29.

"Twinning" is just the job for getting yourself noticed, making contacts quickly, exchanging addresses, making a lasting impression. Just a flick of the wrist is enough to start a conversation.

CHRISTOPH  
0172 / 6262622

# TWIN

## WRITING

with the Twin is a real pleasure. The standard refill with a stainless steel nib and high-grade tungsten carbide ball offers optimum writing comfort. The writing length is over 1000 metres.

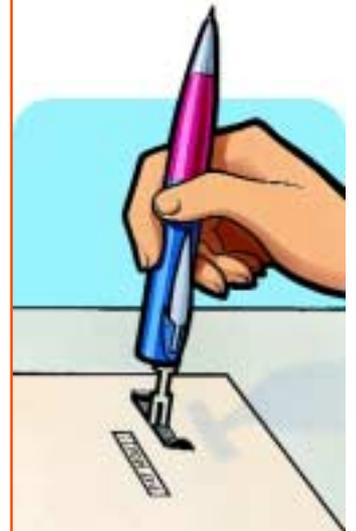

## Clip RELEASE

This is the unique magic formula for converting the Twin into a fully functional stamp with a flick of the wrist. Simply twist the Twin 180° and press the clip: the stamp is ready for printing. The stamp can be closed just as easily: twist the Twin vertically into the writing position, press the clip and that's it.

## STAMPING

in leisure time, at parties, at school, when studying ... The high quality of the self-inking stamp makes a clean imprint every time and thus leaves behind a strong impression.

# V values

Lasting values give security. The Classic Line from Goldring is an expression of our efforts to combine timeless design, functionality and quality.

Competence is communicated by decisiveness. Therefore it is important to mark documents clearly. Identified in this way, there are no misunderstandings.

# CLASSIC

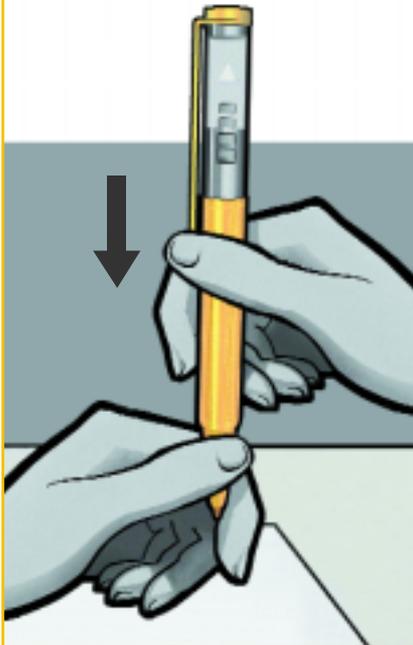

## WRITING

by hand gives your news a personal touch. Goldring writing instruments meet the highest demands for design and quality.

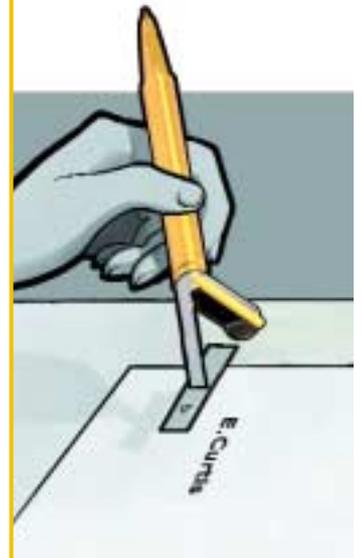

## Repeater MECHANISM

allows you to change smoothly with one hand between the writing and stamping functions. Simply push the cap of the pen downwards — the text plate automatically aligns itself horizontally ready for stamping. Pushing the cap up again closes the pen.

## STAMPING

For stamping with the Classic Line you can choose between the three-line text plate (Automatic) or four-line text plate (Grandomatic and Delphin).

## Instructions for use

### "A pleasure to operate"

The soft-switch turning mechanism which activates the high-quality Twin refill allows ease of handling and maximum writing comfort.

### "Refill changing"

It's simple: Unscrew the ball pen in the middle, change the standard refill and screw it up again.

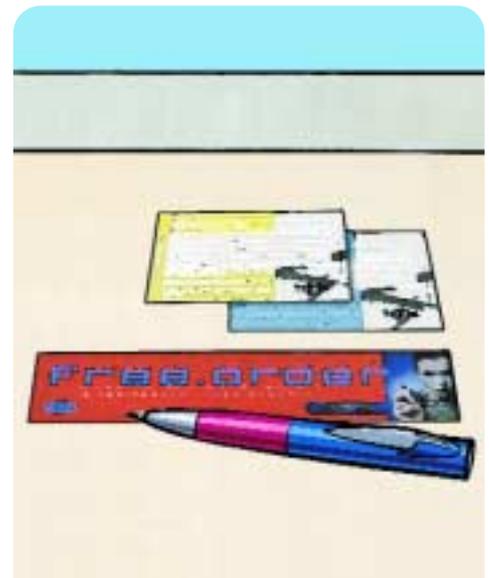

### "Changing ink pad"

Easy and clean: simply press the clip, remove the old ink pad with the holder and insert the new ink pad.

# Stamp service

For both the Twin and the Classic Line, Goldring offers a voucher service to the specialist stationery trade for a free text plate. The customer completes the voucher, sends it to the stamp service department and receives his chosen text plate within a few days. The customer can attach the text plate easily by himself with the aid of the instructions provided.

Complete the voucher and send it to the stamp service department.

# Fitting the text plate

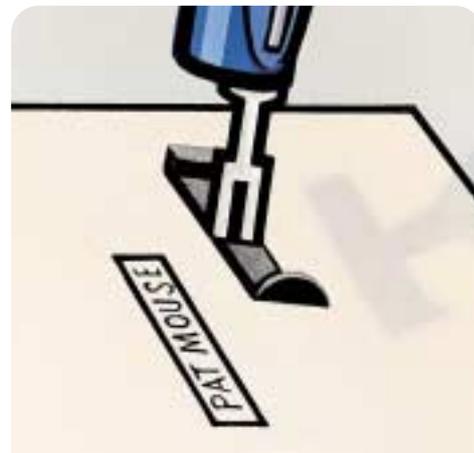

## TWIN

To attach the text plate, release the stamp mechanism, align the stamp plate so that the semicircle is on the right. Remove protective film

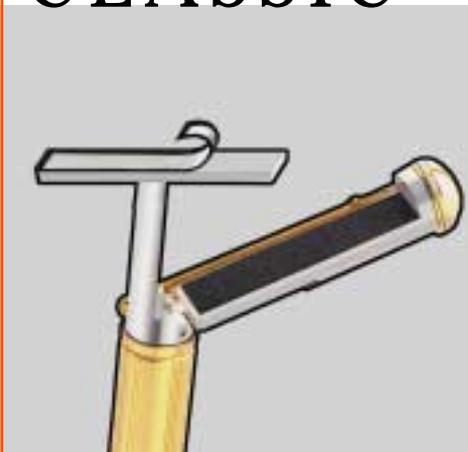

Hold the text plate so that the text is laterally inverted. Position the text plate to the right on the small cross piece and affix.

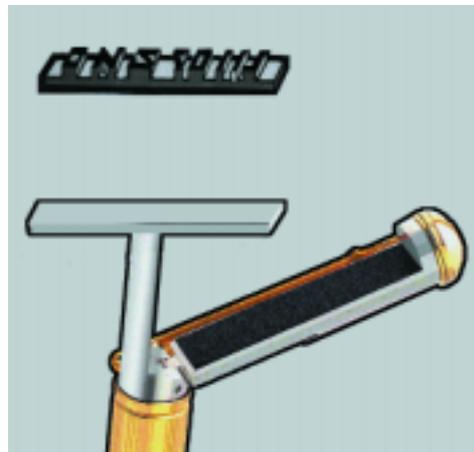

The semicircle helps you to position the stamp correctly for a perfect impression.

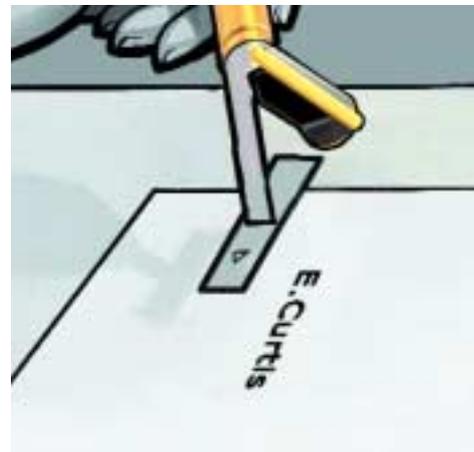

## CLASSIC

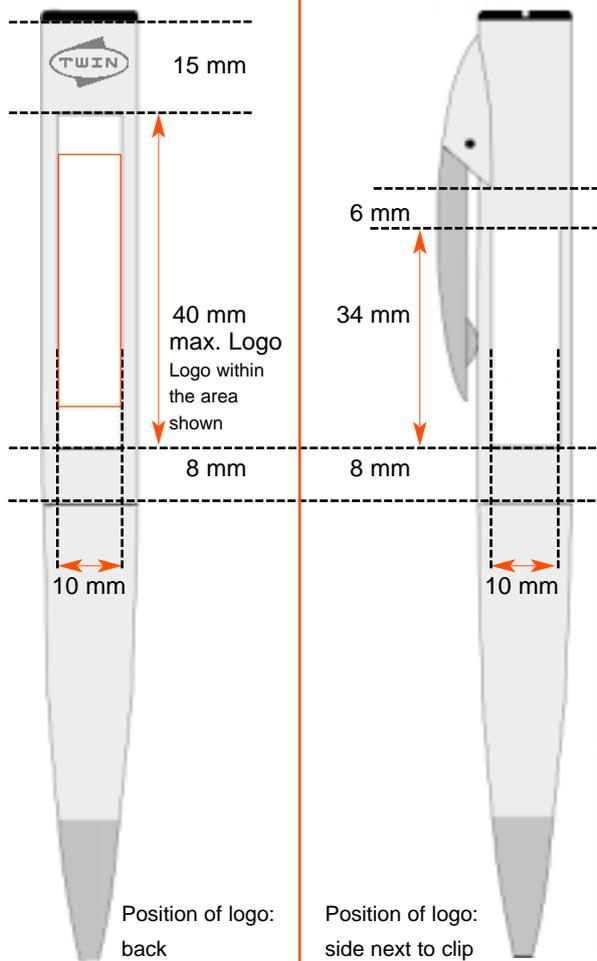

To attach the text plate, release the stamp mechanism with the ink pad to the right. Remove protective film.

Hold the text plate so that the text is laterally inverted. Affix the text plate.

The arrow helps you to position the stamp correctly for a perfect impression.

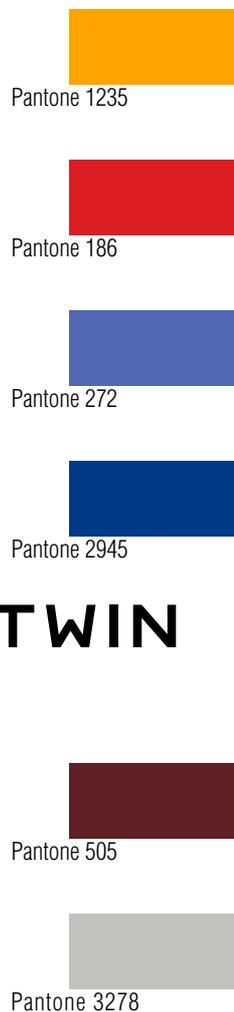

The Twin can be printed in up to 4 colours. The colours must be specified in RAL.

# Colours

You can choose from 5000 Twins in our colour range. Whether it is your favourite colour or your firm's colour; you have the choice.

These sample colours correspond to our standard plastic colours. Other colours are available on request.

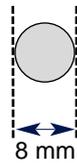

# Logo printing

Goldring products represent functionality, reliability and superior design. Therefore they are ideal as gifts of lasting value. There are many possibilities for individual logo printing – on the body or on the end cap of the writing instrument, either printed or engraved. With Twin you also have the choice of a wide range of colours and colour combinations.
